Subcategory: DayEnd
Software Version/Release: 7.3.2
Subject: Ability to Run Day End on Holidays
Proposal: I would like to be able to run Day End on dates that I set as holidays. When DEOverDu doesn`t run at the end of a vacation period or holiday, there is a day lag time before items become overdue. There was so much confusion with our staff last year that I decided this year not to set one day holidays as a calendar exceptions and to end longer vacation periods 1 day early so that Day End can run before the library is open again. I don`t remember having this problem on Dynix Scholar.
