Administration—Table Editor

Enhancement#: **4061 (11/30/2004)**
Category: Administration
Subcategory: Table Editor
Software Version/Release: Horizon 7.3.2
Subject: Location Groups and Calendars
Proposal: It would be helpful if you could enter calendar exception dates using the location group feature. Right now you have to enter an exception for each location. If you have multiple locations that share some exceptions - it is time consuming. (merge with Enh# 4062)

Enhancement#: **4062 (12/01/2004)**
Category: Administration
Subcategory: Table Editor
Software Version/Release: Horizon 7.3.2
Subject: Location Groups and Calendars
Proposal: It would be helpful if you could enter calendar exception dates using the location group feature. Right now you have to enter an exception for each location. If you have multiple locations that share some exceptions - it is time consuming. (merge with Enh# 4061)

Enhancement#: **4141 (01/13/2005)**
Category: Administration
Subcategory: Table Editor
Software Version/Release: 7.3.1A
Subject: Fee payment log
Proposal: We would like to be able to delete unwanted entries from the Fee Payment Log using Table Editor.

Enhancement#: **4181 (02/15/2005)**
Category: Horizon > Administration
Subcategory: Table Editor
Software Version/Release: 7.3.2
Subject: Mistrake: Adding Titles to the Report
Proposal: I would like to have the ability to add bib titles to the Mistrake error log. When working with duplicate bib errors in the Mistrake table, it`s very time-consuming because I have to search by bib # first. Then I have to do another search by title to find all of the duplicate bibs for that title and send them to the MARC Editor.
