Serials—Printing

Enhancement#: **25 (11/18/2003)**
Category: Serials
Subcategory: Printing
Software Version/Release:
Subject: Module: SER Status: Test Release: 0 Priority: 3 Weight: Large
Proposal: "Would like local definition of print formats for SER printed products including claim letters, route lists, and workslips."
COMMENTS (Per Dynix): Dynix is Reviewing & Testing

Enhancement#: **261 (11/18/2003)**
Category: Serials
Subcategory: Printing
Software Version/Release:
Subject: Module: SER Status: None Release: 0 Priority: 1 Weight: Not Assigned
Proposal: "Need to have a printout of the Copy History screen in Serials Checkin include the title of the serial. Currently, if the Copy History is printed only the phrase 'where serial number=380' is printed. There is no way to search this serial control number."
COMMENTS (Per Dynix): Dynix is Reviewing & Testing

Enhancement#: **665 (11/18/2003)**
Category: Serials
Subcategory: Printing
Software Version/Release:
Subject: Module: SER Status: None Release: 0 Priority: 0 Weight: Not Assigned
Proposal: Printing needs to be simplified and better supported by epicTech. Issues include: splitting call number on spine labels in a meaningful way; solving form fee issues; ability to tractor feed an laser print; ability to attach local printer as network printer; ability to use wider range of printers; user-definable fonts; automatic printing of spine label as each issue is checked in; print routing slips in user definable formats; option to reformat information to utilise sticky label stationary; ability to print routing lists from serials control as well as checkin for administrative purposes (no need for issue-specific info from this option); sometimes a routing list will not print correctly.
COMMENTS (Per Dynix): Dynix is Reviewing & Testing
