Horizon—URSA

Enhancement#: **3871 (08/04/2004)**
Category: URSA
Subcategory: Configuration
Software Version/Release: 2.6.1
Subject: Way to Edit Request in Process
Proposal: Recently we had a customer replace his library barcode number. He had several requests via URSA. Since there is no way to edit those requests we couldn`t input his new barcode number. Then when the URSA requests came in URSA couldn`t do it`s job correctly because of the new barcode number. In Dynix when a barcode is replaced all Dynix related holds transfer from the old barcode to the new. Is there a way to have URSA do this or at least give us the capability to edit a record so staff can enter the customer`s new barcode so when the requests come in there is no problem.

Enhancement#: **4539 (02/27/2006)**
Category: URSA
Subcategory: Network
Software Version/Release: Horizon 7.4
Subject: URSA - Release as Stand-alone Product
Proposal: We would like to see future releases of URSA available as a stand-alone solution you can run on your own servers and have control over how it performs and the data it exchanges - not have it only available as a hosted solution. Especially when the hosted servers are in another country
